

September 2019

Dear Parents:

The grade four students are challenged as intermediates to increase their skill and proficiency at computing basic math facts. The students are receiving a set of *addition flash cards* to be used at home. This will help support the drills, game activities and tests being implemented in the classroom. The students are asked to practice these basic addition facts on a daily basis for 5 to 10 minutes. Adult participation is encouraged.

Please print and return the form below.

Sincerely,

Brad Robins

_____ will make a commitment to practice addition facts on a daily basis.

_____ will make a commitment to assist my child in practicing basic addition facts on a daily basis.
